Function Description

The temperature sensor(s) in your aviation Nickel-Cadmium battery have to be inspected and tested in intervals as mentioned by the respective original manufactures. These are defined in the applicable OMM / CMM / ICA provided by the original battery manufacturers.

In order to meet this requirement, Proponent Battery Services GmbH has designed a temperature sensor test unit and the necessary adapters/cables. With this practical new design, a wide range of temperature sensors can be easily, accurately and professionally tested. The Temperature Sensor Test Unit DC-700 is CE certified.
